The IFM India Expo 2026 serves as a premier platform focusing on the future of Industrial Facilities Management, Strategic Workforce Development, Health and Safety Standards, and the drive for Operational Efficiency. The overall India Facilities Management market is estimated at USD 159.61 billion in 2025, projected to reach USD 227.75 billion by 2030, growing at a CAGR of 7.37%. The sector is driven by rapid industrialization, expansion of manufacturing under initiatives like "Make in India," and the need for operational efficiency, safety compliance and sustainability. Besides, increased integration of technologies like IoT, AI, and automation to improve efficiency, enable predictive maintenance, and lower operating costs.

Rapid infrastructure development, in different regions in India, is increasing the demand for facility management services. While the commercial sector has been a large contributor, industrial and manufacturing facilities are expected to see significant growth in the coming years. There is a strong trend towards industrial facility management, where multiple services like maintenance, security, and cleaning are consolidated under a single contract for better efficiency and cost control.

IFM India Expo drives measurable returns via efficiency improvements, innovation adoption, and partnerships that position businesses ahead of competitors in a rapidly evolving sector. Overall, the IFM India Expo acts as a catalyst for professional growth and business optimization, making it a worthwhile investment for anyone in industrial facility management.
