India Light Expo

19 **20** **21** JUNE 2026
Friday Saturday Sunday
Chennai Trade Centre
Chennai Hall : 1

ABOUT THE EXHIBITION

The Indian lighting industry is fast growing and it is shifting from traditional incandescent and fluorescent lighting toward energy efficient LED luminaires and smart lighting systems. Smart lighting and integrated solutions are gaining traction in cities and corporate campuses. Government schemes like UJALA have a transformative impact on India's lighting market and household energy bills. India's ongoing infrastructure push is likely to keep the lighting industry expanding for the next decade. The Indian lighting market, especially LED, is experiencing significant growth. There is a growing demand for smart, connected lighting solutions that use Wi-Fi, Bluetooth, and IoT, particularly in urban areas. Smart-city and infrastructure projects are deploying sensor-based streetlights, PoE systems, and IoT-enabled outdoor lighting which will keep public-sector demand strong. Offices, hospitals, and schools are starting to adopt Human-centric and health-oriented lighting to improve productivity, sleep and well-being.

The India Light Expo 2026 is a major event for lighting industry manufacturers, innovators, distributors and buyers to meet key industry players and stay up-to-date with the latest trends, technology and best practices currently being applied in the lighting industry besides networking and business growth

EXHIBITOR PROFILE
